

Simply Supermarkets Choose Zentyal Server To Boost its IT Network

Madrid (Spain), November 19, 2013

- *The Zentyal solution significantly reduces the cost of deploying and maintaining Simply's IT systems*
- *The new network infrastructure grants the optimal performance of over 18.000 devices, in 226 shops*

Zentyal, developer of easy IT solutions for small business, announced today that the **Zentyal Server has been adopted by Simply Supermarkets** as the retailer's IT network upgrade, to deliver increased robustness and security. The Zentyal solution has been deployed in order to grant service to over **18.000 devices**, in **226 shops** located in **11 Spanish regions**.

As a consequence of the company's growth over the last few years, Simply Supermarkets needed to **scale up its network infrastructure's capacity**. Zentyal Server integrates three networks: for secure credit card payments, for general operations, and a third for testing and development.

The retailer opted for Zentyal Server after discarding options that require a significant investment in software licenses or hardware. **The easy-to-use web interface and Zentyal Server's open architecture** were key factors when reaching a final decision. *"After considering several other solutions, our conclusion was that none of them were comparable to Zentyal's technology platform",* said **Luis Palomero, CTO at Sabeco-Simply**.

Zentyal Server's simple and powerful administrative web interface increases IT staff efficiency and reduces configuration errors. Zentyal Server's architecture allows the automation of the most common system administration tasks. All these factors amount to **significant savings** in terms of time and resources for Simply Supermarkets.

Deploying Zentyal Server is a straightforward process - users can continue working without disruption, and **the migration process is transparent**. *"No one in the company had their work interrupted by the migration process. Being able to rely on a service that works 100% of the time is very valuable for an IT Manager",* adds Palomero.

About Simply Supermarkets

Simply Supermarkets, part of the Auchan Group, currently owns 226 supermarkets under Simply Market, Simply City, HiperSimply, Simply Basic and Simply Store, 17 petrol stations, 40 associated retailers and is present in 11 Autonomous Communities in Spain, employing over 6.500 people.

About Zentyal

Zentyal designs and develops IT solutions for small and medium businesses since 2004. The company provides SMBs and their local IT providers all-in-one IT solutions that are easy to use, from the server to the cloud. Zentyal-based solutions allow SMBs to reduce and rationalize IT investments, improve the security and minimize system downtime.

Zentyal-based solutions are widely used by small and medium businesses independently of their activity or location, as well as by public administration or the education sector. The partnership agreements signed with IT support and service providers in more than 20 countries guarantee the distribution of Zentyal-based solutions to customers worldwide.
