Exam: Zentyal Certified Associate – ZeCA (ZEN-EXM-ENZECAD)

Zentyal Server provides a Linux alternative to Windows Server®. Thanks to the integration of multiple technologies in a single intuitive tool, you can easily manage all the computer network services, such as network infrastructure, domain and directory, communications, Internet access or security.

Description

The Zentyal Certified Associate (ZeCA) certification validates the knowledge necessary to manage a Zentyal Server deployment in a business environment. The candidates who pass the exam dominate the Zentyal Server architecture, configuration and management of all the network services provided by Zentyal, together with effective and safe maintenance of a computer network and migration of a Windows Server to Zentyal.

Competencies

This exam curriculum includes these general domains:

- General knowledge of networks and Linux
- Zentyal Server architecture
- Zentyal as a Infrastructure server
- Zentyal as a Firewall
- Zentyal as a Domain & Directory server
- Zentyal as a Communications server

Zentyal Server comes with first-ever native Microsoft Active Directory® implementation on Linux that is easy to use. With Zentyal there is no need to use the command line, as system administrators can manage all network services through an intuitive graphical interface.

Exam details

- Type of questions: Multiple choice, matching, short answer
- Number of questions: Approx. 60
- Duration of the exam: 45 minutes
- Passing of the exam: A score of 70% or above is needed to pass the exam
